Education

University of Southeastern Philippines

Davao, Philippines

Bachelor of Science in Information Technology

June 2025

Cum Laude

Experience

Hyper Access Solutions

Davao City, Philippines

Web Developer

Nov 2025 – Present

- Developed and maintained business applications for accounting, inventory, and operational workflows using C#, JavaScript, HTML, CSS, and MySQL.
- Built and refined user interfaces for transaction-heavy modules, improving usability, data entry flow, and system consistency.
- Debugged application issues across frontend, backend, and database layers to improve reliability before deployment.
- Collaborated with developers and end users to translate workflow issues into practical system fixes and feature improvements.

Skills

- Languages: PHP, C#, JavaScript, HTML, CSS, Dart
- Frameworks: Laravel, React, Flutter
- Tools: VS Code, Visual Studio, MySQL, Firebase, Supabase

Projects

Semi | Mobile App

React Native, Expo, Offline-First Architecture

- Built an offline-first personal finance app for salary planning, wallet-based budgeting, and payable tracking.
- Designed budgeting flows for income allocation, balance monitoring, and reduced manual computation errors.
- Implemented core modules for salary plans, wallets, payables, transaction history, and settings.

BumbleBee | Mobile App

React Native, Offline-First Design

- Developed an offline-first workout planning app built for real training conditions with unreliable internet access.
- Structured the app around fast routine access, simple navigation, and practical workout planning flows.
- Focused on usability, reliability, and offline access instead of generic fitness tracking features.

Traco | Web App

Traceability System, Supply Chain Monitoring

- Built a cacao traceability system to improve record consistency and operational visibility across supply chain workflows.
- Supported real-time tracking and user-facing workflows for field users and supply chain stakeholders.
- Centralized traceability records in a web-based system for easier access, monitoring, and management.
